

## Mind and Music: Insights from Brain Science

Four Valuable Presentations  
\$42.95 for Set (Includes booklet)

### Meeting the World with Music (18 months to 7 years)

(Chicago: National Early Childhood Music Conference [keynote] 73 min., 1 CD)

Music can play an important part in developing movement skills, fostering social engagement, and laying the groundwork for thinking, as it gives each child the gift of a musical childhood.

### Music's Gifts to the Developing Mind (4 to 14 years)

(Detroit: Orff Schulwerk National Conference [presentation] 73 min. 1 CD)

Brain research clearly supports the wisdom of offering music to all children. Music's brilliant patterns engage the mind while encouraging each child and each culture to sing out and be heard.

### Falling in Love with Music: Styles and Stages (7 to 14 years)

(Kansas: Kansas Music Teachers Association Conference [keynote] 73 min., 1 CD)

Each temperament has special gifts, obstacles and needs that change as the child moves through each cognitive stage. This talk is filled with humor and great ideas that all teachers can use.

### Music and the 21st Century Mind (3 years to Adulthood)

(Kansas: Fort Hays State University music conference [keynote] 73 min. 1 CD)

As the brain goes through growth and change, music has ways to meet and support each stage. Discover "what's up" at each stage, and learn how music can coach the unfolding mind.

### Booklet

#### The Brain's Timetable for Developing Musical Skills (16 pages)

This booklet addresses musical skill development and contains many useful ideas for teaching children at each developmental stage.

Dr. Joy Coulter, Ed.D, is a nationally recognized neuroscience educator with 14 years of experience as a special education teacher and director of education programs, including an alternative school for dropouts. She holds a master's degree in special education from the University of Michigan and a doctorate in neurological studies and holistic education from the University of Northern Colorado. Dr. Coulter was on the faculty of Naropa University in Boulder, Colorado for 20 years and has taught graduate courses through the University of Northern Colorado for many years.

Dr. Coulter is known for her ability to present complex ideas to music educators with a clear and humorous style. In workshops across the country, she has inspired teachers with her insights about the latest brain research and its application to music education.
